

FREE Real Time Financials Consulting

Financial Operations and MAIS Financial Business System Analysts want to meet with you to discuss how your unit can best utilize the Real Time Financials toolkit options: eReconciliation, Reporting Budget Ledger, and Unit Defined Commitments.

Units around campus are already benefiting from Real Time Financials.

“Plant Operations currently uses a cumbersome paper audit system to verify SOA transactions. We are hoping to eliminate that process and use the eReconciliation process in the near future,” said Rich Steiner, Division Controller at Plant Operations. “(eReconciliation) is faster and doesn’t require the storage of documents that our current process does. We’d save trees and office filing – both good things for the environment!”

Consulting offers you and your unit an opportunity to learn how to:

- Best use these financial tools to provide rich and timely reporting data that supports your business decisions.
- Leverage the enterprise systems to reduce your need to maintain data in supplemental systems.
- Contribute your ideas to further enhance the University’s financial tools and systems.
